STEP IMPLMENT NEW UI AND CODE IN IPAK5

1) Copy and Paste this code in cmd (to make file can write):

```
sudo chown -R pi:pi /home/pi/PythonProj/iDSWRAP/
sudo chmod -R 775 /home/pi/PythonProj/iDSWRAP
```

2) Open Folder > Click Folder Python Project > and search this file (main.py , setting.py, synchtx.py, test_api_ipack5.py)

- Open main.py > Copy code from main.txt > Paste in main.py in Raspberry PI> Click save
- Open setting.py > Copy code from setting.txt > Paste in setting.py Raspberry PI > Click save
- Open synchtx.py > Copy code from synchtx.txt > Paste in synchtx.py Raspberry PI > Click save
- Open test_api_ipack5.py > Copy code from test_api_ipack5.txt Raspberry PI > Paste in test_api_ipack5.py > Click save

3) Once all saved > Open Cmd and run this comman > copy all and paste in in command

```
# Fix to make it readonly file :
# Make all critical files owned by root and read-only
cd /home/pi/PythonProj/iDSWRAP/
sudo chown root:root main.py setting.py synchtx.py test_api_ipack5.py
sudo chmod 444 main.py setting.py synchtx.py test_api_ipack5.py

# Make the entire directory read-only for users
sudo chmod 555 /home/pi/PythonProj/iDSWRAP/

# But keep barcode files writable
sudo chmod 777 /home/pi/PythonProj/iDSWRAP/current_barcode.txt
sudo chmod 777 /home/pi/PythonProj/iDSWRAP/upload_status.txt

#Run this once add new coding:
cd /home/pi/PythonProj/iDSWRAP

# Stop everything
```

```
sudo pkill -f synchtx.py
sudo pkill -f main.py

# Update test_api_ipack5.py with the new version above
#nano test_api_ipack5.py

# Update synchtx.py with the new version above
#nano synchtx.py

# Clean database
cd PythonProj/iDSWRAP
mysql -u ida -p'ida6422690' -e "UPDATE idaesd.ipak5 SET updtms = '1';"

# Check remaining
mysql -u ida -p'ida6422690' -e "SELECT COUNT(*) as total FROM idaesd.ipak5;"
sudo reboot
```
